**Diluted aqueous systems of ciprofloxacin-hydrochloric acid:**
**self-organization, physicochemical properties and effects on hydrobionts**

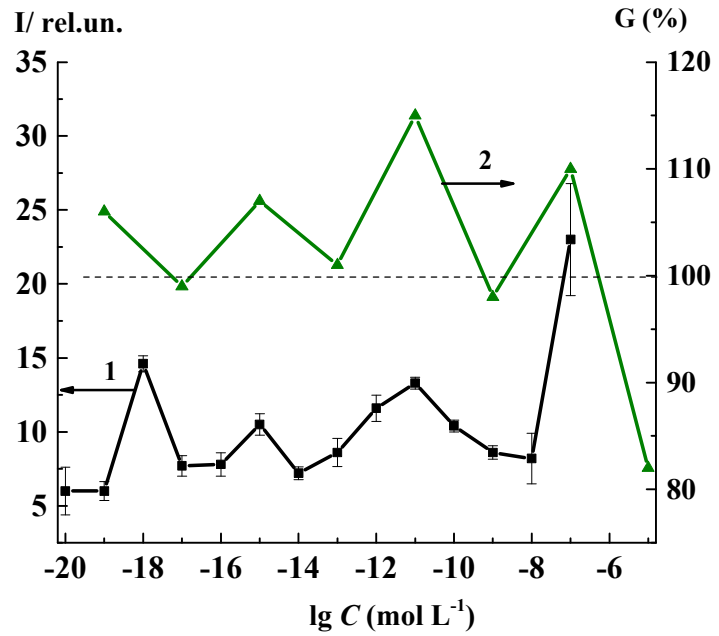

Fig. S1. Dependence of fluorescence intensity (1) of the systems of series **1** and growth of green algae *Chlorella vulgaris* (2) on the concentration.

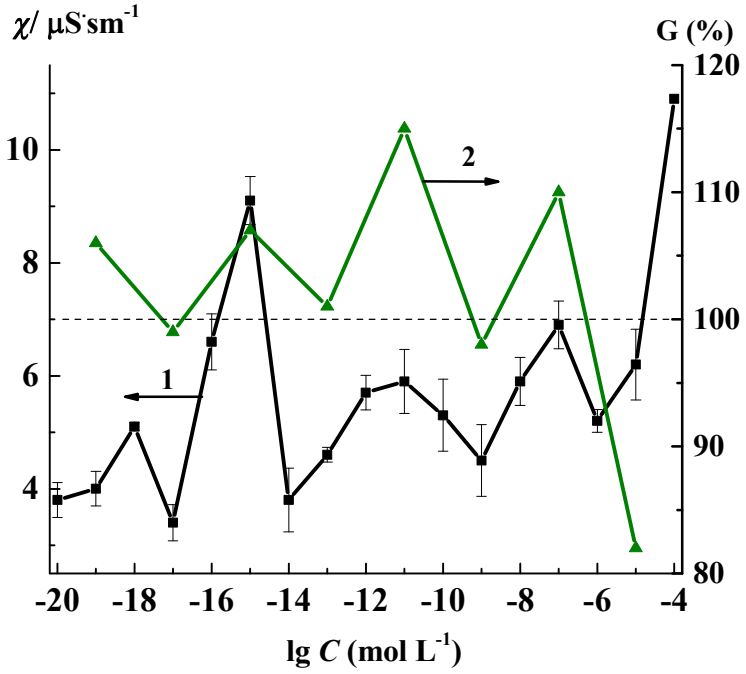

Fig. S2. Dependences of specific conductivity (1) of the systems of series **1** and growth of green algae *Chlorella vulgaris* (2) on the concentration.

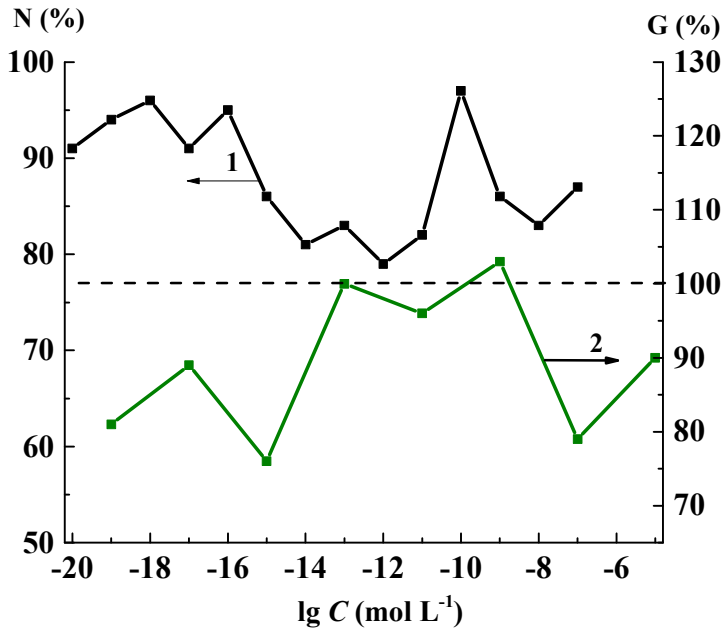

Fig. S3. Dependences of the percentage content of particles (1) of the systems of series **2** and growth of green algae *Chlorella vulgaris* (2) on the concentration.
